The Prevention of Neuroma Formation by Diathermy: An Experimental Study in the Rat Common Peroneal Nerve

SC Tay, LC Teoh, FC Yong, SH Tan

In the above-mentioned article published in the June 2005 issue of *Annals, Academy of Medicine, Singapore*, we inadvertently left out an acknowledgement to the Department of Experimental Surgery, Singapore General Hospital for their invaluable assistance, expert advice, and use of facilities; without which, the successful completion of this project would not have been possible.
