

Supplementary Table S1. Tolerability of COVID-19 vaccine re-vaccination with respect to timing and severity of initial reaction.

	Re-vaccinated with same mRNA vaccine		Re-vaccinated with non-mRNA vaccine		Did not re-vaccinate
	Tolerated re-vaccination	Did not tolerate	Tolerated re-vaccination	Did not tolerate	
Immediate onset, mild (n=10)	8 (80%)	0	1 (10%)	0	1 (10%)
Immediate onset, moderate-severe (n=9)	1 (11%)	0	8 (89%)	0	0
Delayed onset, mild (n=14)	13 (93%)	0	0	0	1 ^a (7%)
Delayed onset, moderate-severe (n=31)	10 (32%)	1 (3%)	12 (39%)	0	8 ^a (26%)

mRNA: messenger RNA

^a Total of 3 patients (1 patient with mild delayed onset reaction and 2 patients with moderate-severe delayed onset reactions) were not revaccinated as their reactions occurred at the 3rd vaccination dose, with no further vaccinations being indicated as per prevailing vaccination guidelines at the time.

All values expressed as no. (%).
