Table 1. Results. (Cont'd)

Percentage agreement and Fleiss' kappa result	Fleiss' kappa			
	Percentage agreement (%)	<i>k</i>	<i>z</i>	<i>P</i> value
Percentage agreement and Fleiss' kappa for each item				
Item 1. The pattern of failure to control intense, sexual impulses or urges and resulting repetitive sexual behaviour is manifested over an extended period.	46	0.137	2.09	0.036
Item 2. The pattern of repetitive sexual behaviour causes marked distress* or significant impairment in personal, family, social, educational, occupational, or other important areas of functioning. [*Note for rule out] Distress that is entirely related to moral judgments and disapproval about sexual impulses, urges or behaviours is not enough to meet this requirement.	51	0.287	4.38	<0.001
Item 3a. Engaging in repetitive sexual activities has become a central focus of the person's life to the point of neglecting health and personal care or other interests, activities and responsibilities.	49	0.236	3.6	<0.001
Item 3b. The person has made numerous unsuccessful efforts to control or significantly reduce repetitive sexual behaviour.	68	0.345	5.27	<0.001
Item 3c. The person continues to engage in repetitive sexual behaviour despite adverse consequences (e.g. repeated relationship disruption, occupational consequences, negative impact on health).	56	0.261	4.00	<0.001
Item 3d. The person continues to engage in repetitive sexual behaviour even when the individual derives little or no satisfaction from it.	86	0.104	1.59	0.111
Percentage agreement and Fleiss' kappa if cases met with criteria of CSBD	58	0.304	4.46	<0.001

CSBD: compulsive sexual behaviour disorder
